

# The Curious Case of Belgium

By Craig Paardekooper

The following figures are obtained directly from the VAERS database –

Country	Total Number of Adverse Reports	Deaths	Disabilities	Life Threatening	% of Reports that are Severe
Belgium	7530	230	4815	260	70.5
Romania	1763	142	398	501	59.0
Finland	4300	127	1476	500	48.9
Sweden	7587	337	2668	680	48.6
Malta	142	32	13	16	43.0
Hungary	890	314	36	32	42.9
Slovakia	399	46	46	41	33.3
Greece	3413	135	362	504	29.3
Ireland	3971	91	823	219	28.5
Denmark	3447	147	387	295	24.0
Portugal	6861	83	1314	132	22.3
Norway	4213	246	359	286	21.1
Czech Republic (Czechia)	3913	105	262	452	20.9
Poland	1509	215	25	63	20.1
Netherlands	9479	556	835	279	17.6
Italy	18715	644	1496	1086	17.2
Luxembourg	405	14	23	27	15.8
Croatia	1341	42	59	106	15.4
Spain	8796	336	331	668	15.2
Iceland	479	34	11	24	14.4
Germany	30109	1752	458	1836	13.4
United Kingdom	101909	821	9830	2443	12.8
Switzerland	4201	177	160	171	12.1
France	29708	1532	760	1293	12.1
Lithuania	672	23	14	26	9.4
Estonia	968	57	5	24	8.9
Latvia	517	27	4	7	7.4
Austria	21302	435	174	258	4.1

70% of the reports for Belgium are severe, – resulting in either death, disability or in a life threatening event - compared to 12% for the UK – a 5 x difference.

The diagram on the following page shows which countries are having the greatest problems with the vaccine.

Curiously, these very high percentages in Belgium result from very high disability rates following vaccination, rather than a high death rate. The death rates seem similar to other countries, but the disability rate is sky high. This is a major safety signal requiring investigation.

This effect is not confined to one batch/lot. All lots used here are generating extremely high numbers of severe reports. This level of injury would qualify the vaccine as a bio-weapon - testing at this level restricted to specific countries.

LOT	Total Number of Reports	Death	Disability	Life Threatening	% of Severe Reports
FH8469	105	2	88	1	87
ER2659	160	1	126	4	82
FE2090	124	1	92	5	79
FE9174	101		72	5	76
FE2625	176	2	124	6	75
EW6126	305	8	171	13	63
FC2336	125	1	65	10	61
EK9788	116	6	60	3	59
EM0477	171	25	63	4	54

Ratio of severe VAERS to total VAERS per country

## **Athletes dying in their prime**

Recently, a large number of vaccinated athletes have dropped dead during televised matches.

See –

<https://www.howbad.info/athletes.pdf>

<https://www.howbad.info/sportscardiac.pdf>

So I decided to look at the “athletic” age range in Belgium – those people aged 18 years to 35 years old.

Here are the results –

## **General Adverse Reactions**

887 reports in total for 18-35 year olds in Belgium

700 reports (79% of all the reports) – the onset of adverse reactions was within 24 hours

804 reports (90% of all the reports) – the onset of adverse reactions was within 48 hours

## **Disability**

738 reports in total for 18-35 year olds in Belgium

604 reports (81% of all the reports) – the onset of disability was within 24 hours

702 reports (95% of all the reports) – the onset of disability was within 48 hours

The stronger a toxin is, the faster it will kill or maim. The % of reports where young people are being maimed within 24 hours after taking the vaccine is very high.

## **I leave you with three observations**

1. The high % of reports that are severe - (70%)
2. The immediacy of onset of that severity - (81% within 24 hours)
3. The disabling of otherwise young, healthy people of athletic age – (18yr-35yr)

Do you still think it is a good idea for a parent to vaccinate their son, their daughter, their child?

## **They made a mistake**

It is very obvious that what ever these young people took was highly toxic. But I believe we were not meant to see this.

A 12 % severity rate is less discernible, less obvious and would have remained quietly hidden below the radar of human perception. At a 12% rate, the masses could have been slowly eliminated in bi-annual steps and few would have realised what was afoot.

But a 70% rate is like a blaring siren. For some reason, batches sent to certain countries were too toxic. In 24 hours we saw what would happen in other countries in 24 months. 600 cripples.

We saw what we were not meant to see.
