A dream in passion has become a reality.

Reports are accumulating on pathological findings after corona vaccines, in deaths from sudden deaths and in people with severe Louis symptoms (in the first comment, a very important video for medical professionals).

Devastating inflammation has been found in the large and small blood vessels in the heart, brain, health and other organs, where the spike protein from the vaccine is found. The link to vaccination is a proven fact.

Release of cholesterol from the third layer.

Vascular amyloidosis.

Blood clots are big.

Effects of an autoimmune.

We were assured that the mRNA disappears from the injection site a few hours later - it is 60 days in organs far from the injection site.

Promise us that only the muscle cells that are injected produce the spike protein - it is found in a variety of body tissues, including sperm cells, and in inflammatory and fungal processes.

mRNA vaccines for corona were developed in a process that turned corners. Toxic testing has not been done properly on animals. The effects of Lowe in the original experiment were covered up and in post marketing surveillance were hidden.

The population in the experimental country was forced to be vaccinated first.

The more the preparation was given to people who were not at high risk from coronavirus- it was forbidden to do so in the absence of safety information, as the increasingly exposed Pfizer agreements prove. And especially in the face of its low efficiency and even negative.

Europe is now reporting an increase in mortality in countries with high vaccination rates of tens of percent.

Sudden deaths must be investigated in connection with vaccination.

The use of vaccination must be stopped immediately until a thorough investigation.

I don't know a sane doctor who would recommend the preparation in the face of the findings presented. I don't know a rational person that would agree to use the concoction.

If I have pain over medicine in the days of Corona this is how we doctors allowed it all to happen, contrary to the foundation of medical ethics

First of all do not harm primum non nocere

In honor of the people who were affected
